 Superfast 30 Mbps and faster up to 100 Mbps The generated date is when coverage was at
 the figures quoted. There is a small amount of lag between broadband infrastructure
 providers making services available and appearing in the statistics. We aim to update the
 coverage percentages weekly, with the underlying service availability for postcode searches
 changing several times in a week. If you have a service available and our searches do not
 indicate it is do feel free to report an addition. About Us 99% Internet Uptime NSM was
